

# Pearie Law Wind Farm

Local residents newsletter

Issue two • February 2016

## Welcome

Dear Resident,

The Pearie Law team would like to wish all the local residents a happy new year.

Whilst Pearie Law has seen many challenges since our last newsletter we are glad to note we are almost on track to meet the objectives of the project. Before the turn of the year we were very thankful for the weather however this has taken a slight turn for the worse and hampered progression slightly.

We would like to thank the feedback that we have received from residents since the last newsletter and believe that the issues have been addressed. As always we invite any further comments on the contact details noted below.

Pearie Law Towers and Blades at Grangemouth Docks

Turbine 3 Formation

## Community Fund

EDF-ER has continued to work with the local community bodies and Local Authority to identify and finalise the community fund arrangements which will best benefit the community. If you should have any comments or suggestions on this again please do not hesitate to get in contact.

Finally EDF-ER are also looking to continue our commitment to the local community by sponsoring the local Harburn Festival on the 11th of June, details to be confirmed in the next newsletter.

## Work to Date

The vast majority of civil works on site has been complete with only 2 turbine bases left to pour after which heavy construction traffic will reduce significantly. In addition to this off site access works is complete to allow for turbine deliveries in and areas readied for on site for storage.

EDF Energy is a trading name used by EDF Energy Customers plc. Reg. No. 02228297 whose registered office is at 40 Grosvenor Place, London SW1X 7EN, incorporated in England and Wales. The responsibility for performance of the supply obligations for all EDF Energy supply contracts rests with EDF Energy Customers plc.

# Pearie Law Wind Farm

## Health and Safety Initiatives

As noted above EDF-ER's top priority is health and safety. As a Health and Safety initiative we have carried out a Directors tour of the Pearie Law Site which constituted directors from each of the major contractors reviewing the site to identify opportunities to enhance the Health and Safety culture. This was closely followed by a Health and Safety day at Harburn Golf club where the theme of the day was "Safety Awareness and Contractor Interfaces".

Turbine deliveries will commence at the start of February with completion approximately 24th of February. Deliveries will be done in conjunction with local police force and escorted to site in the early hours of the morning to avoid disruption. As noted previously the route to site will be along to C24 with a left turn along the U40 to site. Should you require further details on deliveries please do not hesitate to get in touch.

Health and Safety is EDF-ER's number one priority and as winter weather started at Pearie Law we have worked alongside West Lothian Council in carrying out gritting the route to site. As shown above (red dash line) additional areas of road have also been gritted as a community measure.

## Remaining Works Programme

The major civil construction works for the project will shortly be ended with the handover to electrical and turbine works. Please see below for key dates:

**Mid February 2016** – Last Foundation Pour, Turbine Component Delivery and Start of Off-Site HV Cable Works

**End February 2016** – Completion of wind farm cabling and start of turbine erection

**April 2016** – End of Turbine Erection and Installation

**June 2016** – Wind Farm Energisation

**July 2016** – Wind Turbine Commissioning and Testing

**August 2016** – Pearie Law Wind Farm moves into Operational Phase

Further newsletters will contain more details as they become available particularly regarding off sites works including the cable installation works to be carried out by Scottish Power.
